

**GET OUT OF OUR HOUSE**  
**(parody of "I Like It Like That" by Pete Rodriguez)**  
**Mike Delaney, 6/20/20**

Four years of unrelenting tweets  
Need to push back with a Latin beat  
Because our time is coming fast  
A tidal wave; a siren's blast

It's time to end the unending lies  
No more state dinners of cheeseburgers and fries  
The return of cool; the return of class  
Need to throw out the orange ass

You need to go  
Get out of our house  
Now, don't be slow  
Get out of our house

The White House is ours  
Get out of our house  
It's within our powers  
Get out of our house

Your time is through  
Get out of our house  
We're sick of you  
Get out of our house

'Cause we can't breathe  
And we're in need

It's time for change  
'Cause you're deranged

This is for all the Black lives  
We pray that hope can survive

You are unable to walk the walk  
We don't want no Chopper Talk

The President should deserve respect  
But this one is from a racist sect

Send him down a slippery slope  
And wash his lying mouth out with soap

The White House is the people's house  
We shouldn't be led by a cheating louse

We need to hear if from every throat  
This the year to remote the vote

Yes, this is the time we need to vote  
But all he knows is how to gloat

Get all your friends to hit the polls  
That's how we'll achieve our goal

You need to go out and vote  
You need to go out and vote

Intro for live performance:

Years ago, I was in a bar in San Juan, Puerto Rico and I saw on the TV a salsa band singing a song where the lead singer would sing a line and then the band members would sing the hook. I wanted to write a song like that. Then a couple months ago I heard a car commercial and the background music was Pete Rodriguez' song, "I Like It Like That", and I knew that would be the starting point for my song.

Tonight, please join me in performing "Get Out of Our House". In the second half of the song I invite you to unmute yourself and sing out "Get Out of Our House". Sing it like the election depends on it. I want to hear you. We may overdrive the microphones, but so be it.

OK, I'm going to share my screen and start the video. Here goes...
